MYSON DÉCOR RADIATORS MAKE THE GRADE AT PERSHORE HIGH SCHOOL

Myson DÉCOR radiators have been installed in the brand new art block at Pershore High School, Worcestershire. The new building was opened by MP Harriet Baldwin and will provide the very best facilities for the school's budding young artists.

Head Teacher Clive Corbett commented, "As a school we had to source quality products which would provide many years of reliable service, and the Myson brand has a reputation for doing just that."

The Myson DÉCOR is available in both horizontal and vertical models, making it perfect for large scale products where different size and shape spaces need warming. The DÉCOR is one of the brand's most popular products; its closely configured flat tube design creating a stunning designer look, whilst needing very little water to create a comfortable environment.

"The DÉCOR is available in a huge range of sizes and the introduction of the new DÉCOR Classic means that there is a model to suit every setting and budget for future projects," explains Kelly Smith, Myson Product Manager for Radiators.

Pershore School's award winning new art block building cost £3m took just under a year to complete and will now house a number of classrooms that will allow students to get the most out of their time spent studying art. It is the result of a two year lobbying project which secured funding from the Education Funding Agency to bring the best facilities for the school's students.

The Myson DÉCOR is engineered to the highest standards and comes with a 10 year product guarantee for added peace of mind.
