

MPRT

MPRT

PROGRAMMABLE ROOM THERMOSTAT

MPRT is an easy to use programmable room thermostat. It utilises Smart Start technology which can give the user considerable savings on heating bills by varying start-up times. The Smart Start system is continually learning the temperature rise requirement, delaying the startup of the system, therefore saving energy during milder weather. A radio frequency version is also available.

PRODUCT SUMMARY

- Uses Smart Start technology
- 24 hour or 7 day programming
- 3 temperature settings - comfort, economy (set back) and frost
- 4 programmes (3 preset, 1 adjustable) with manual override
- Clear, accurate LCD display
